

ENPM-662
Final Project
100 pts:

Submit a final report describing your individual project. Submit a .pdf of your report. If you want to submit a video, use .avi or .mp4 format. Other files may be submitted in a zip, but the report and video (if applicable) should be submitted outside of the zip folder. The main factors in grading your reports will be what did you actually accomplish and how well is it reported. With regard to the quality of your report, if we give your report to another student in this class, could that student understand what you did and roughly replicate your results (without relying on the zip materials)? With regard to what you did, careful attention to detail and thoroughness are important. It is also important to test your results. A suggested rubric is below:

Organization: /10
Motivation: / 10
Assumptions: /10
Thoroughness/attention to detail: /15
Scope of achievement: /20
Model Validation/Testing: /20
Replicability: /15
